

**Spring finger contacts** are used for grounding and dynamic connections on electronic assemblies.

These spring finger contacts (SMT) are designed to withstand tens of thousands of compression cycles. They are widely used for connections on automotive projects for example. These spring finger contacts are delivered in reel for automatic SMT assembly.

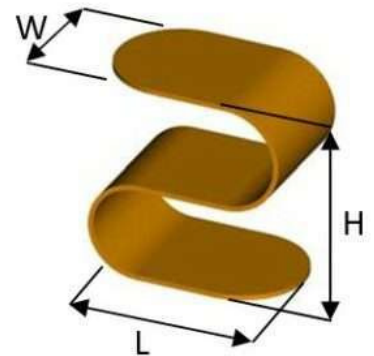

We provide compression rates and associated forces for each spring finger contact on request. Recommended compression is 20% to 40% of the overall contact height.

Spring finger contacts (SMT) can be standard (see our catalog below) or tailor-made.

## PRODUCT SPECIFICATIONS

| PROPERTY       | VALUE TOLERANCE                            |
|----------------|--|
| Thickness      | 0,08 mm                                    |
| Width          | 2,00 mm $\pm$ 0,2                          |
| Length         | 3,00 mm $\pm$ 0,2                          |
| Height         | 3,10 mm $\pm$ 0,2                          |
| Basic material | Copper beryllium (CuBe)                    |
| Plating        | Barrier layer NI<br>Outer layer AU         |
|                | 1 $\mu$ m - 2 $\mu$ m<br>$\mu$ m - $\mu$ m |
