

PRODUCTS RANGE

SPRING FINGER CONTACTS (SMD)

Tape and reel packaging (SMT) for automatic assembly. Standard geometries or custom designs. Compression curves available on request.

SMD FOAM PADS

Tape and reel packaging for automatic assembly. Standard or catalogue items. To be soldered on PCB. Excellent resilience (over 90% compression possible).

EMI SHIELDING COVERS AND FRAMES

Supplied in tray or reel for automatic assembly. Standard or custom designs. Manufactured via cutting, folding, or stamping.

THERMAL PASTE

High-performance thermal interface materials (>17W/m.K). Wide selection of standard materials (hardness, conductivity, non-silicone, etc.). Custom packaging (syringe, pots, tubes).

SMT INSERTS

Standard catalogue parts. Custom inserts available for obsolescence or specific designs.

SILICONE GASKETS

Custom manufacturing of conductive or standard gaskets for EMI and IP sealing. Design and groove profile advice available on request.

EMC FOAM GASKETS

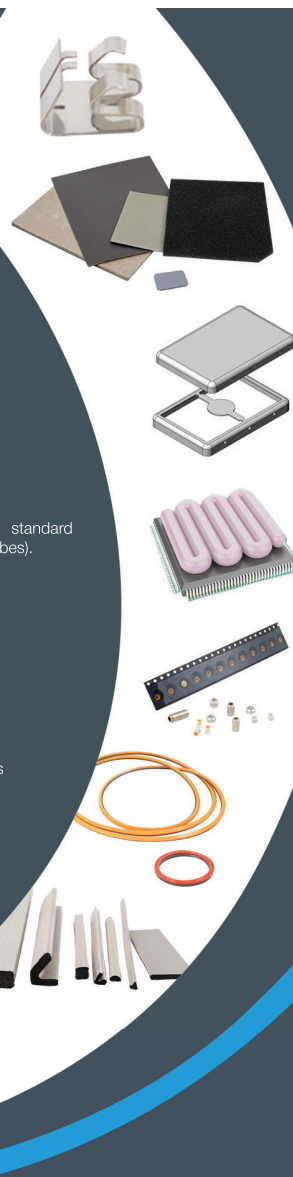

Conductive gaskets for EMI shielding. Custom cutting for specific EMI shielding gaskets (e.g., flat connector gaskets). Several profiles available.

HEATSINKS

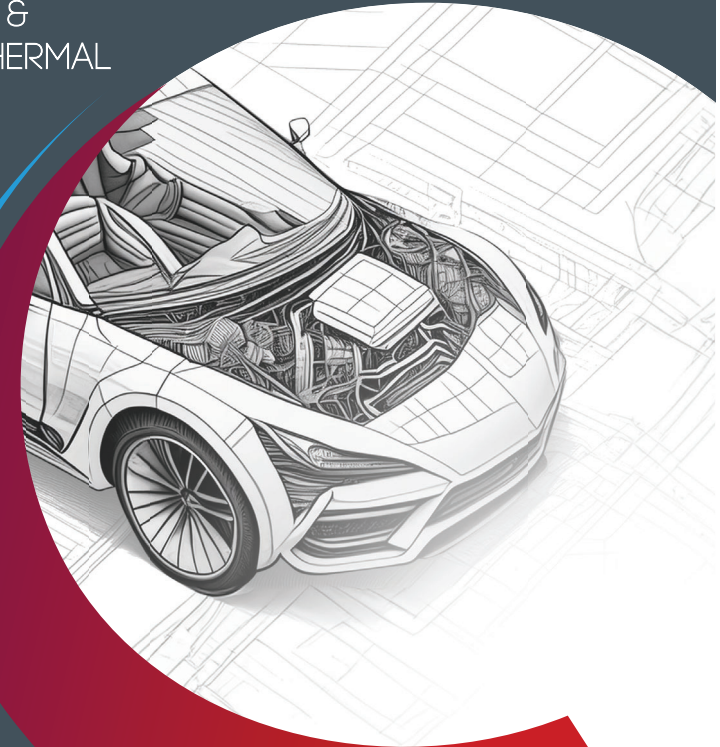

Extrusion, machining, forging. From prototypes to mass production. Supplied in tape or tray for automatic placement. Can be delivered integrated with thermal interfaces.

FIRE RESISTANT FILM

Protection of electrical assemblies against fire risks (Minimum 10 minutes at 1,300°C). Used, for instance, in battery assemblies or bus-bar protection.

EMI SHIELDING & ELECTRONIC THERMAL MANAGEMENT

OUR CUSTOMERS

1, Rue Terre Neuve - Bat. L
91940 LES ULIS
01 81 87 13 00

AUTOMOTIVE

Electromagnetic Compatibility & Thermal Management

INFOTAINMENT DASHBOARD
ECUS BATTERY ASSEMBLY
RADAR MULTIMEDIA

SPRING FINGER CONTACTS (SMD)

Grounding and contact in vibratory environment (infotainment)

SMD FOAM PADS

Connection and grounding with high compression rate.

EMI SHIELDING COVERS AND FRAMES

Protection and shielding of electronic components on PCBs.

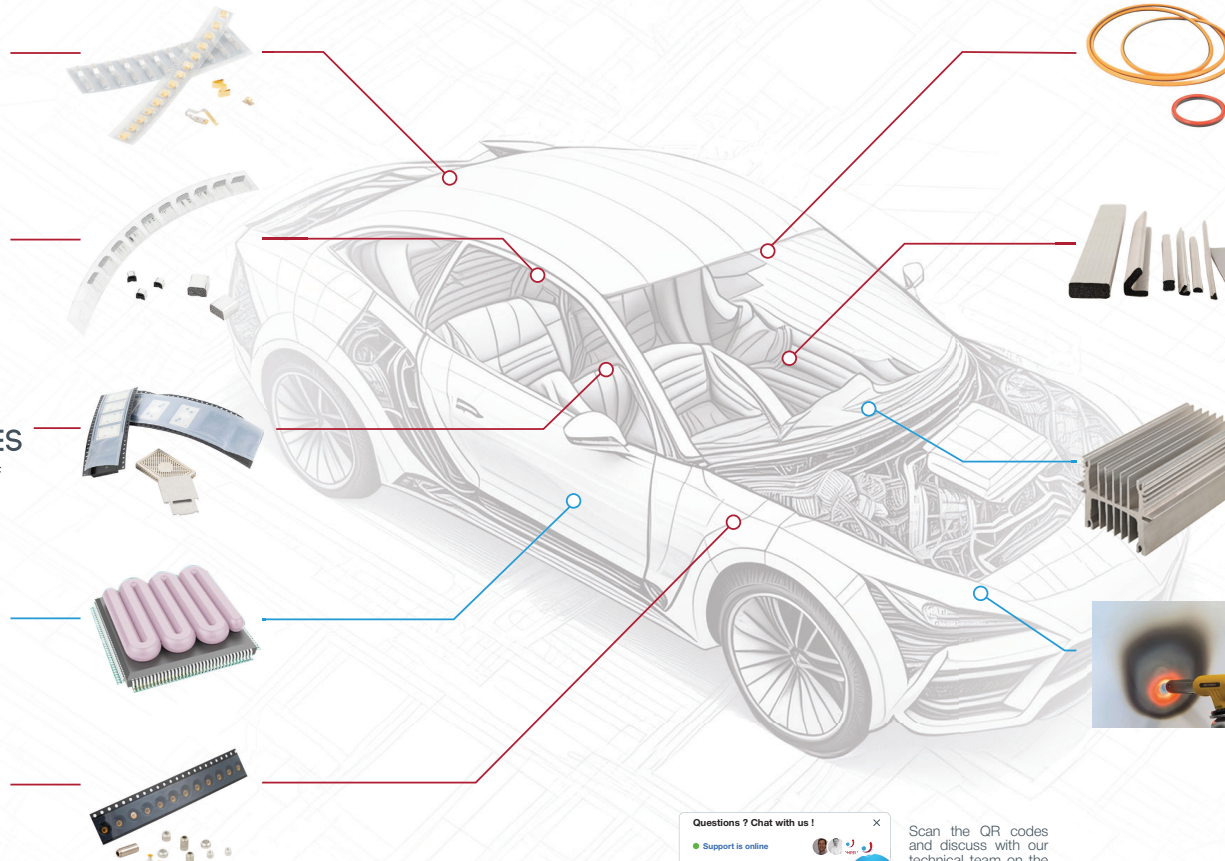

THERMAL PASTE

High-performance thermal interfaces for heat transfer and equipment protection.

SMT INSERTS

Standard or custom inserts and standoffs. Packaged for automatic placement.

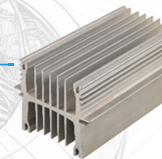

SILICONE GASKETS

Extruded or molded silicone, conductive or non-conductive. For EMC and IP sealing.

EMC FOAM GASKETS

Thermoformed conductive fabric around polyurethane foam. Standard or custom profiles. Custom cutting.

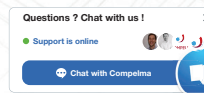

HEATSINKS

Extrusion and machining as per drawings. Custom surface treatment. Thermal simulation available on request.

FIRE RESISTANT FILM

Protection film for fire and high temperatures (Resistance up to 1,300°C for 10 minutes).
